

Excellence Awards

The City of Albuquerque, Public Works Department, Wastewater Utility Division, Industrial Pretreatment Program and Pollution Prevention Program, will present Awards of Excellence at a January 2002, City Council meeting, to the following businesses for their superior performance during the July 1, 2000 - June 30, 2001, Program Year:

Industrial Pretreatment Award of Excellence

Ethicon Endo-Surgery, Inc. (a Johnson & Johnson Company)

Pollution Prevention Program Award of Excellence

University Hospital

These award winners have gone above and beyond regulatory requirements and have reached out to accomplish the true spirit and intent of pollution prevention.

The Industrial Pretreatment Program has also selected a number of permitted business for this year's Gold and Silver Awards. Gold Awards have been presented to businesses with 100% compliance in both reporting and process water discharge compliance. Silver Awards have been presented for 100% reporting compliance with at least 90% discharge compliance. Gold and Silver award winners must also have an active pretreatment system or exceptional pollution and source reduction. The awards winners are as follows:

The City currently has a nationally recognized Pollution Prevention Program and has been accepted in a federal pilot project under the President's Excellence In Leadership Project XL. The City's work with Project XL will include the permanent integration of Pollution Prevention with Industrial Pretreatment to increase voluntary source reduction in the residential, commercial, and industrial sectors while continuing to maintain a high level of environmental performance standards. If any further information is desired about the City Pretreatment and Pollution Prevention Program, please contact the program office at 873-7004.
